Dataversity Demo Day

John Price - Technical Success Manager
Anna Montanes - Senior Product Manager

October 5, 2022

Problem: Managing and getting value from unstructured data

➜ IT has **more apps and data to manage**

➜ **Fragmentation** across app silos

➜ Explosive **growth of unstructured** data volume and complexity

➜ Unstructured data is harder to **control** and **analyze**

➜ **Value is hidden** in embedded messaging, notes, comments, tasks

+625%
Users in less than two years

onna

The governance / knowledge trade-off

Governance

Minimize and control data to mitigate risk

Knowledge

Capture & extract insights from data to drive growth

onna

What if you could….

Connect
Collect from all your apps in a single and repeatable, no-code approach to centralize and easily access your data
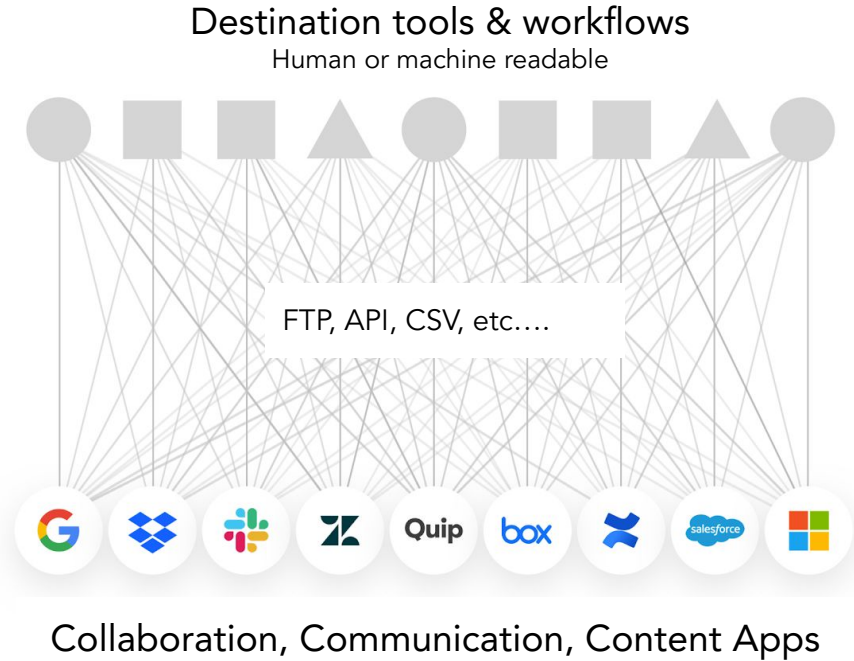

Know
Find what's important and gain insights faster without having to manually sift through everything

Do
Take action for eDiscovery
using newly discovered knowledge

onna

One-off methods to
identify and extract
data from each app
individually is
inconsistent,
time-consuming,
error-prone and
expensive.

Destination tools & workflows
Human or machine readable

FTP, API, CSV, etc....

Collaboration, Communication, Content Apps

onna

The Onna Knowledge Integration Platform

Your ONE, consistent method for discovery collection across your workplace apps

Data Discovery

Data Classification

Retention Management

Knowledge Repository

Application Consolidation, and more….

+ No-code Collection
+ API for Virtually Any Source

+ ML Classification Service
+ Common Data Model
+ Real Time Processing

+ Govern & Extract Knowledge
+ Enable Powerful Workflows
+ Data Export

What data and systems does Onna enable?

Onna provides a no-code connector approach to getting data into the platform for the most common enterprise workplace apps, and an API for when a connector is not available.

COLLABORATION

- Slack Enterprise
- Microsoft Teams
- Zendesk
- Confluence
- Jira
- more…

COMMUNICATION

- Gmail
- Microsoft Outlook
- Zoom
- Twitter
- more…

CONTENT

- GDrive
- Microsoft OneDrive
- Dropbox
- Box
- more…

PLATFORM API

Migrate and Consolidate: on premise, custom and legacy systems into Onna

onna

Our Customers

Onna partners with the most innovative companies to help them control and derive actionable insights from unstructured data.

"

We love how Onna uses AI to help us improve information search across multiple platforms."

Take action on your unstructured data

Collect
Collect unstructured data. Define the timeframe, individuals, channels, folders and more.

Share
Manage data access by employees.

Automate
Automate data collection, retention, sharing, curation, monitoring deletion, export and more.

Manage
Define data retention for different kinds of data and manage the data lifecycle.

Classify & monitor
Discover and curate your knowledge, monitor user activities.
