

## Dataversity Demo Day

John Price - Technical Success Manager

August 10, 2022

# Problem: Managing and getting value from unstructured data

- IT has **more apps and data to manage**
- **Fragmentation** across app silos
- Explosive **growth of unstructured** data volume and complexity
- Unstructured data is harder to **control** and **analyze**
- **Value is hidden** in embedded messaging, notes, comments, tasks

**+625%**

Users in less than two years

**+3,400%**

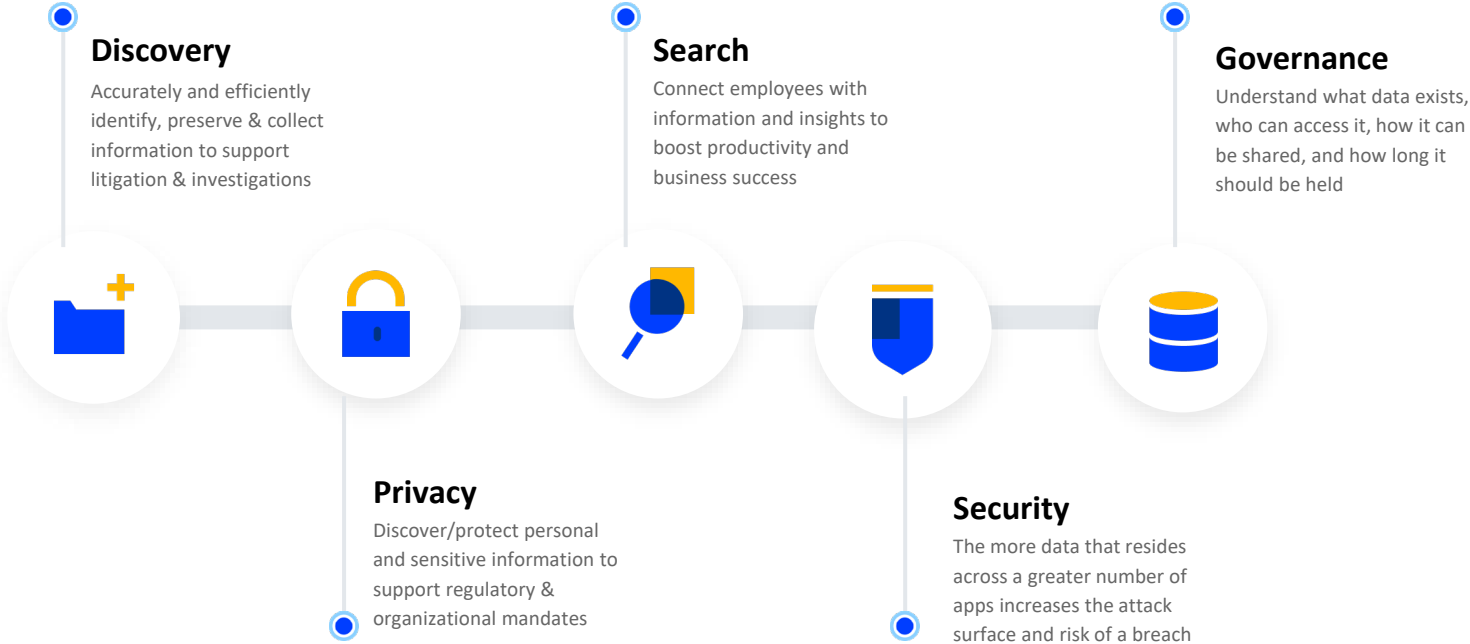

Daily participants in one year

**+77%**

Paid customers in two years

# Common challenges

# The governance / knowledge trade-off

## Governance

Minimize and control data to mitigate risk

## Knowledge

Capture & extract insights from data to drive growth

# What if you could....

## Connect

Collect from all your apps in a single and repeatable, no-code approach to **centralize and easily access your data**

## Know

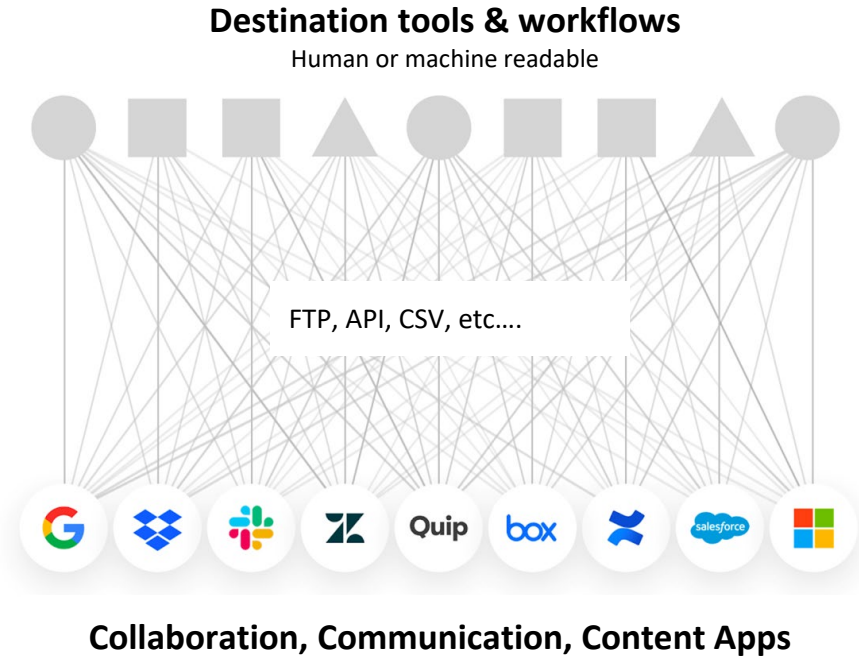

Find what's important and **gain insights faster** without having to manually sift through everything

## Do

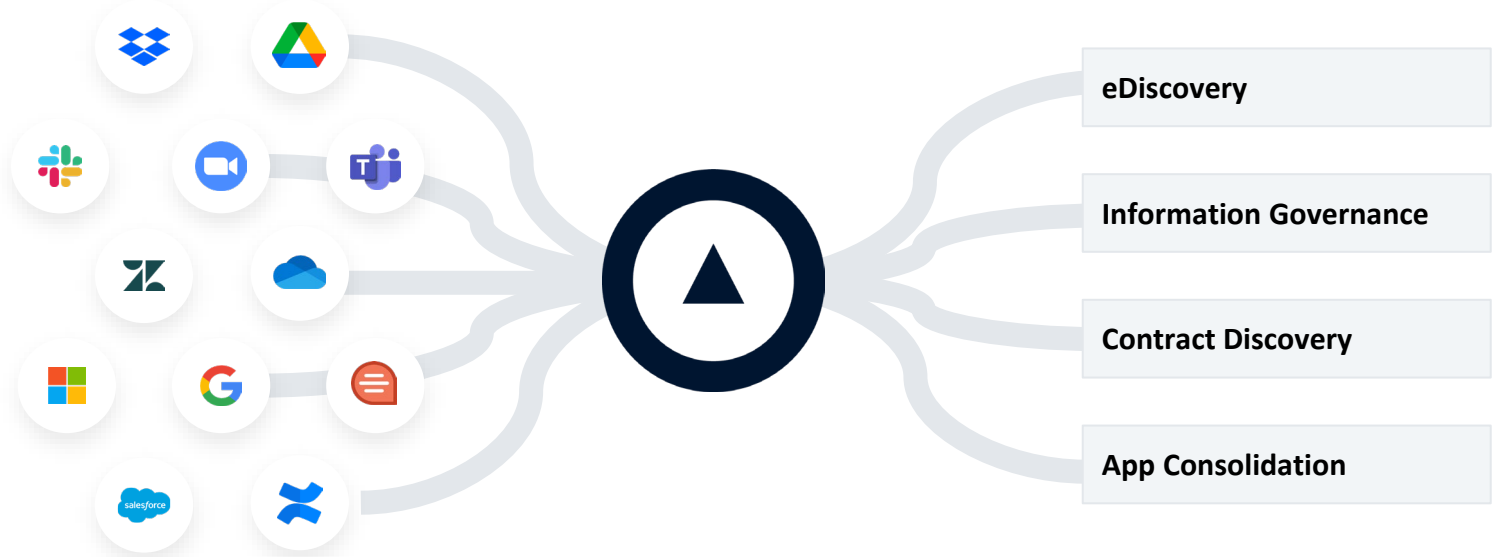

**Take action** for eDiscovery  
using newly discovered knowledge

One-off methods to identify and extract data from each app individually is **inconsistent, time-consuming, error-prone and expensive.**

# Onna Knowledge Integration Platform

Your one, consistent method for discovery collection and management across your workplace apps

# The Onna difference

Key Capabilities	Onna Differentiation
 <b>Connect &amp; Collect</b>	→ <ul style="list-style-type: none"><li>• No code</li><li>• User defined person-centric collections</li><li>• Broad app support pre-built</li><li>• API to collect from <i>your</i> app ecosystem</li></ul>
 <b>Process &amp; Render</b>	→ <ul style="list-style-type: none"><li>• Proprietary real-time data transformation</li><li>• Indexing across apps</li><li>• Human + machine readable</li><li>• True-to-source view</li></ul>
 <b>Discover &amp; Action</b>	→ <ul style="list-style-type: none"><li>• Basic and Advanced Search</li><li>• ML enhanced data</li><li>• Action framework</li><li>• Export</li></ul>

# What data and systems does Onna enable?

Onna provides a no-code connector approach to getting data into the platform for the most common enterprise workplace apps, and an API for when a connector is not available.

## COLLABORATION

- Slack Enterprise
- Microsoft Teams
- Zendesk
- Confluence
- Jira
- more...

## COMMUNICATION

- Gmail
- Microsoft Outlook
- Zoom
- Twitter
- more...

## CONTENT

- GDrive
- Microsoft OneDrive
- Dropbox
- Box
- more...

## PLATFORM API

Migrate and Consolidate:  
on premise, custom and legacy  
systems into Onna

# Making it simple for companies to make informed decisions

We love how Onna uses AI to help us improve information search across multiple platforms.”

**Lev Finkelstein**

VP of Corporate Finance & Strategy

From the power of the platform to the team as a whole, I can't recommend Onna enough.”

**Sylvie Stulic**

Senior Manager of Legal Operations and Litigation

Better now has a go-to solution to conduct faster, more comprehensive investigations.

**Jeff W.**

Lead SOC Analyst

Onna is the most robust, modern, easy-to-use eDiscovery product we've evaluated.”

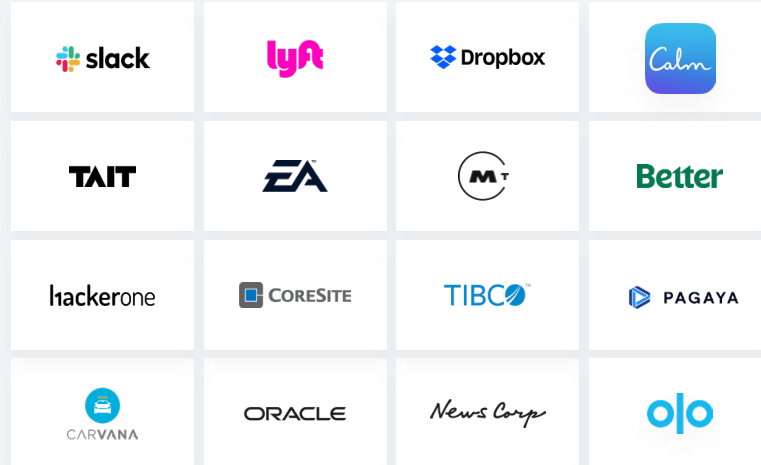

**Jason Spinell**

Director of the Slack Fund

# Our Customers

Onna partners with the most innovative companies to help them control and derive actionable insights from unstructured data.

**Thank you!**
