Semarchy Master Data Management

Ensuring fast, successful data initiatives

The Data Platform Solving All Enterprise Data Needs

Start with any data capability → scale with the data platform

Semarchy

Semarchy Data Platform

Differentiators

- Integrated Solutions
- Open Connectivity
- Dynamic Flexibility
- Complexity Adaptation
- Seamless Scalability

Modules

On-Prem, Cloud, Hybrid, SaaS (2025.H1)

Data Management

Master Data Management

Trust Your Data.

SaaS

NEW

Data Intelligence

| Data Catalog | Data Governance | Data Quality Monitoring |

Leverage Your Data.

On-Prem, Cloud, Hybrid

Data Integration

| Data Integration | Data Connectors |

Orchestrate Your Data.

Capabilities

Outcomes

Features

Rapidly generate no-code data apps to manage golden data across any domain

Collaboratively govern, improve & monitor data from assets to initiatives with activated metadata

Easily design and deploy low-code, high-performance data pipelines anywhere

2

Master Data Management

Rapidly generate no-code apps to manage data across any domain

Semarchy

Use Cases

Parties
Customer B2B/B2C, employees, suppliers, citizens

Things
Products sell & buy sides, assets, financial instruments

Places
Locations, stores, POI, sites

Reference Data
Organizations, cost centers, finance data, classifications

Capabilities

Model-Driven
Single model approach for all domains/use cases

Data Quality
Enrich, validate, match and merge with full traceability

Apps and APIs
Generated data application and APIs

Profile & Measure
Built-in profiling and custom dashboards

Workflows
Customizable data collaboration

Data Integration
Bidirectional, batch and real-time integration

All Implementation Styles in a Single Model

Concurrently support the four most common implementation styles for MDM/RDM/ADM

Semarchy

For real-time central reference

Matches and links to create a "virtual" system of records. Physically **stores the global ID** that links to data from source systems

For Reporting, Analytics and Central Reference

Matches and physically **stores a consolidated view of master data**

For harmonization across Systems & for Central Reference

Matches and physically **stores and publishes consolidated view of master data**

**System of Record for Operational and Analytical Systems**

Matches and physically stores the up-to-date consolidated view of master data. **Authoring of master & reference data (RDM) in MDM**
