

# Win With Data. Never Lose Control.

July 2024

Data & AI Security Platform

**ADAM GAULDING**  
Solution Architect

# About Me

I'm a Solution Architect at Satori. I've been working in and around the data space for all of my career as a BI and database developer and consultant. I have experience helping both large and small companies in various verticals solve business problems with data.

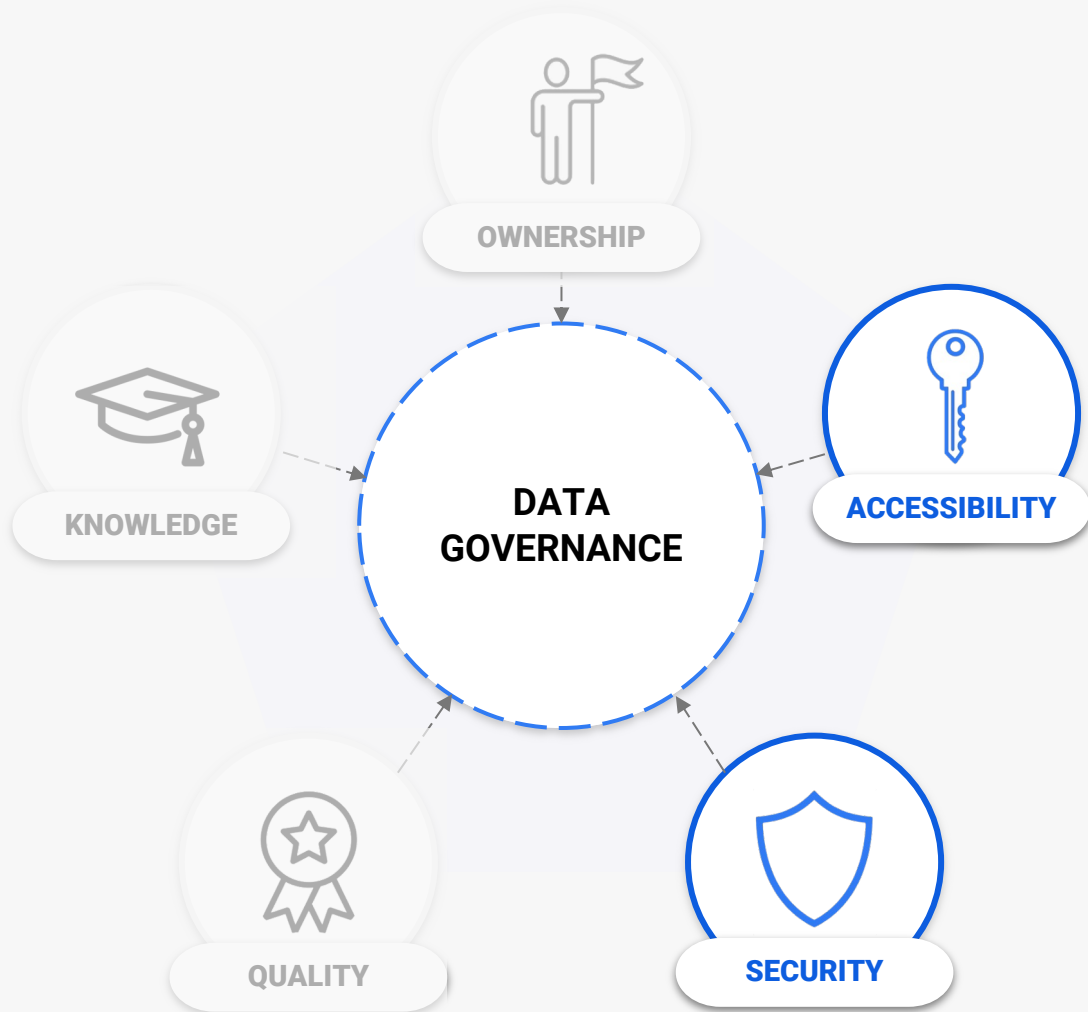

# Data Governance

Data governance is everything you do to ensure data is secure, private, accurate, available, and usable.

It includes the actions people must take, the processes they must follow, and the technology that supports them throughout the data life cycle.

# Data Governance

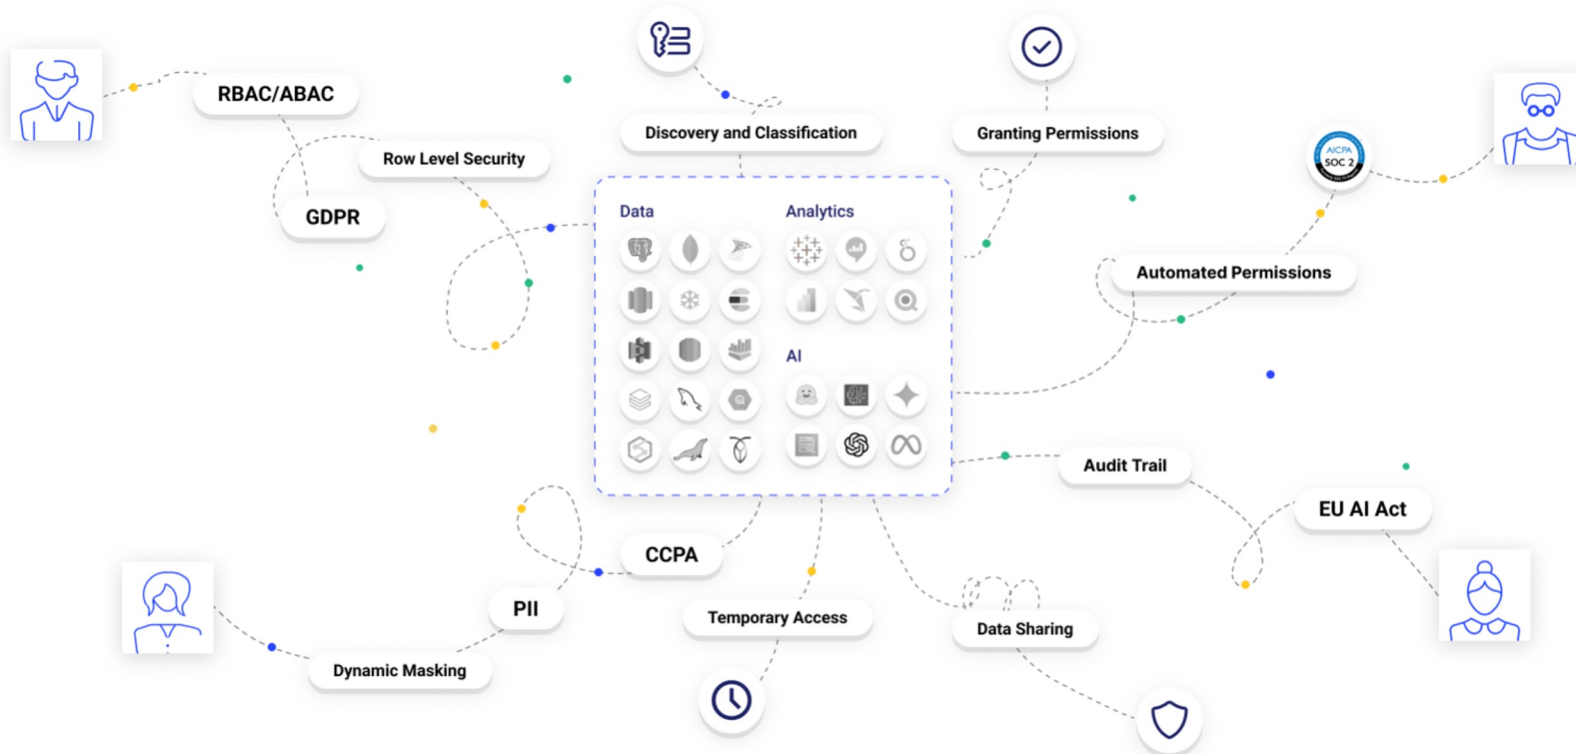

Data governance is everything you do to ensure **data is secure, private, accurate, available, and usable.**

It includes the actions people must take, the processes they must follow, and the technology that supports them throughout the data life cycle.

# Scaling secure and compliant data usage is **getting exponentially harder**.

**The current approach:**  
Disconnected from the business.  
Siloed and complex to implement.  
Expensive to implement and operate.

# Satori streamlines data usage with **business-driven security and compliance** across applications and data sources.

**25%**

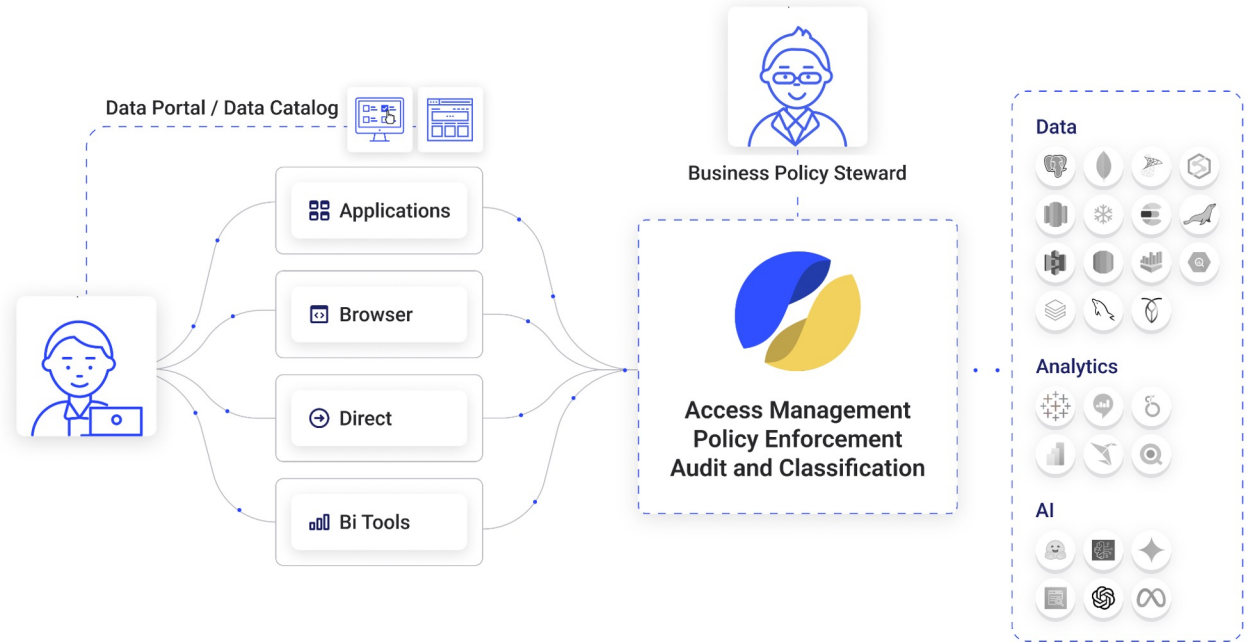

productivity gain  
across data admins  
and consumers

**3x**

faster delivery and  
adoption of AI & data  
products

**100%**

of security and  
compliance  
requirements met

- Centralized Access Management
- Role & Attribute Based Access Control
- Row / Column Level Security
- Masking
- Auditing

- Data Portal
- Self-service Access
- Automated Credential Expiry
- User Access History and Auditing
