

Dataversity Demo Day: AI Governance

AI Governance is no different – Or is it?

Shantanu Sharma- Product Management, Precisely

Mike Ortmann- Solutions Architect, Precisely

Introductions

Shantanu Sharma
Data Integrity Suite
Product Manager,
Precisely

Mike Ortmann
Solutions Architect,
Precisely

Precisely delivers Data Integrity for AI

Comprehensive
data integration

Data quality &
governance

Enriched
data

Strategize and drive your AI/ML initiatives with a business outcome driven approach

AI Governance
is no different.

Or is it?

Key considerations for AI Governance

AI is mission critical

AI is part of the core business strategy, no longer experimental.

Key Points:

- AI value and explainability are required.
- AI literacy & collaboration across business, operations, and IT teams is imperative.

Regulatory oversight

Enforces responsible AI development and deployment.

Key Points:

- **Pending legislation** at 32/50 states.
- EU AI Act - August 2025: penalties take effect.

Agentic AI

AI systems to act autonomously to complete tasks and achieve goals.

Key Points:

- By 2027, 50% of AI models will leverage some agentic AI.
- Lack of transparency complicates accountability and compliance.

Many new stakeholders are accountable

AI Councils

Data Science
teams

Legal teams

Security teams

Business
teams

IT teams

Model Sprawl is a real challenge

- Lack of visibility into models across silos
- Inconsistent compliance and accountability
- Higher operational and model costs

Unique AI Governance requirements

Ensure AI models are delivering value
as intended

Agility to address evolving regulatory
requirements world-wide

Provide visibility & accountability
for many new stakeholders

Ability to scale & adapt to AI
use cases enterprise-wide.

What you will see

1

Model explainability, value,
& goals

3

Visibility & accountability across
new stakeholders

2

Agility to adapt to evolving
regulatory requirements

4

Centralized & standardized
model management

Demo

What you saw

1

Model explainability, value,
& goals

Enable users of all types to
understand the importance of AI to
the organization

2

Agility to adapt to evolving
regulatory requirements

Configurable policy management
enables continual improvement of
regulatory management

3

Visibility & accountability across
new stakeholders

Stakeholders of all types can easily
locate and understand the use and
purpose of AI by the organization

4

Centralized & standardized model
management

Define and enable repeatable processes
for model management and user
engagement

Jump start your AI Governance Framework

Through Precisely Data Strategy Consulting

Why it matters

Companies struggle to adopt AI due to:

- Misaligned goals
- Weak governance
- Poor data quality

How we help

- 6-week engagement identifies gaps and builds strong data foundation so you can confidently move forward with AI

AI Readiness Assessment

- **AI alignment:** Match AI use cases to business goals
- **Governance check:** Establish responsible frameworks
- **Data discovery:** Identify quality & metadata gaps
- **Model optimization:** Improve training sets/reduce bias
- **Roadmap & next steps:** Clear path to AI success

Power your AI strategy with Precisely

Unite AI teams end-to-end through a single, business-friendly solution

Innovate quickly with a scalable, future-proof AI framework

Leverage leading AI practices to ensure success

The leader in data integrity

Our unique combination of software, data and consulting delivers **trusted data**. Data that is accurate, consistent, and contextual to power more confident business decisions.
