Data Driven: People, Process, Technology

Customers ask

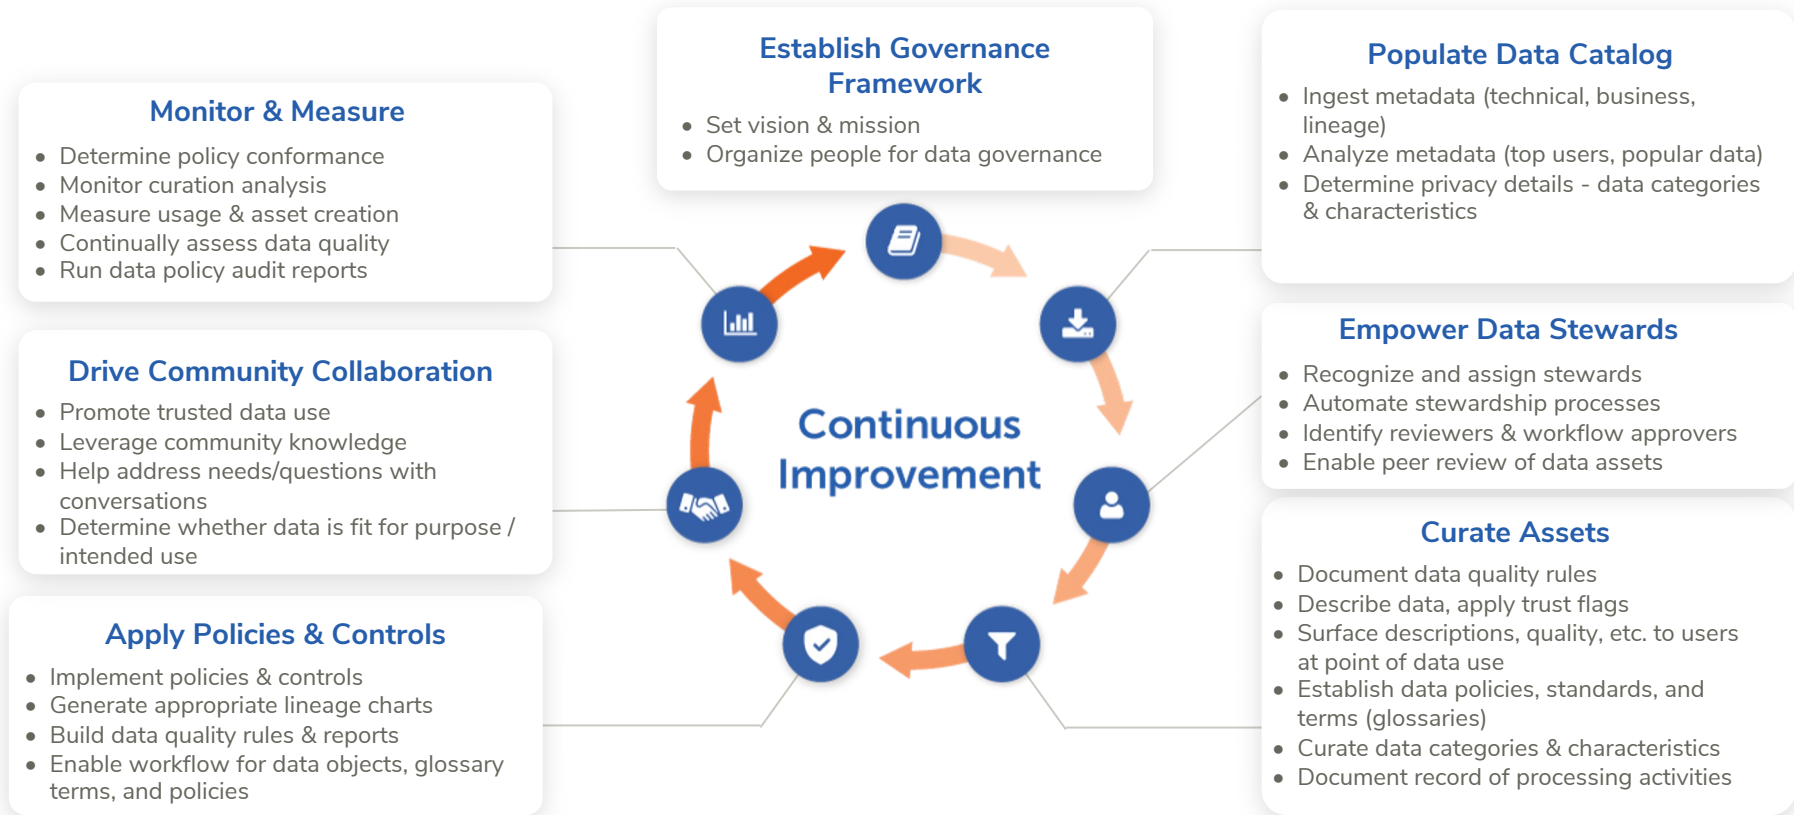

- What do I do?
- Where do I start?
- How do I get to success?
- How do I measure that success?
- How do I build to get to the next milestone?

Our solution

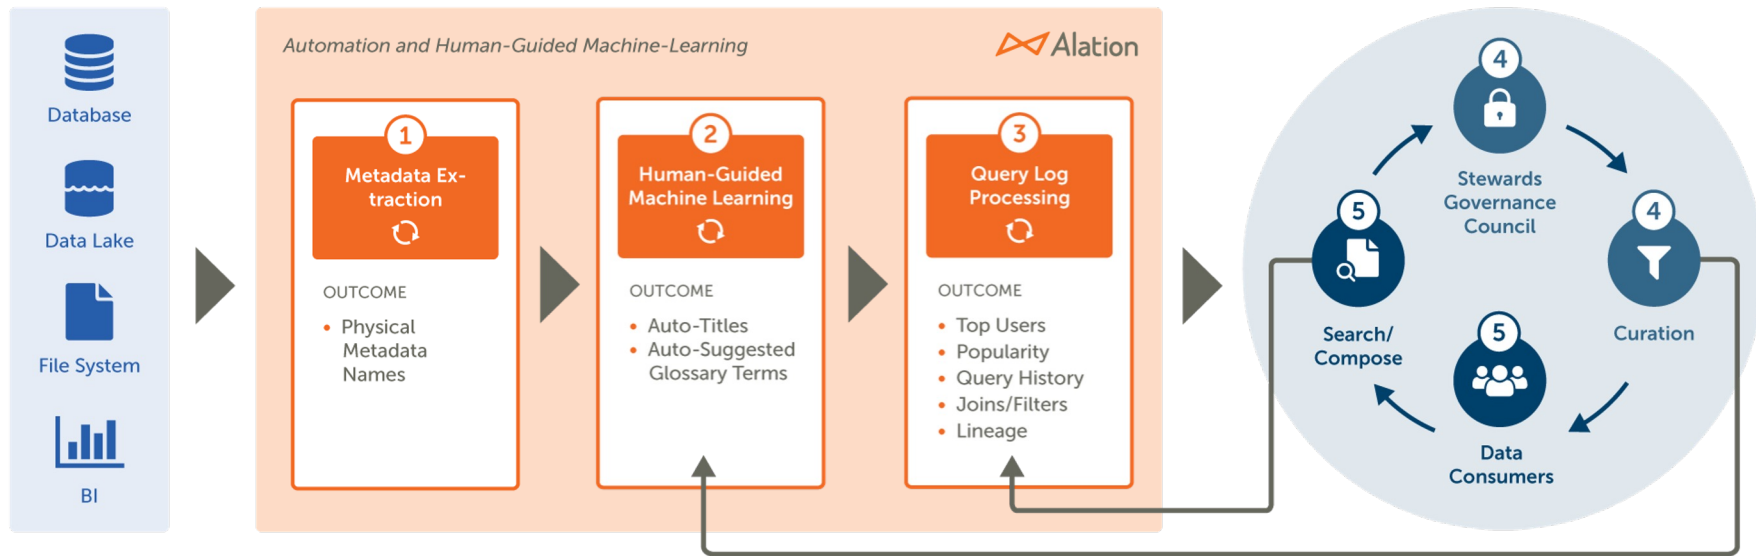

- **Active Data Governance Methodology:**
Our autonomous, continuous improvement methodology guides organizations to help create a data-driven culture through data governance.

How Alation Powers Active Data Governance

Active Governance Methodology

Build Your Own Data Governance Framework

Introduction

Real-World Data Governance – Monthly Webinar Series

November 16, 2023: How to Select the “Right” Metadata to Govern

Third Thursday each Month @ 2pm EST – Register at TDAN.com, KIKconsulting.com, DATAVERSITY.net

Upcoming Events

Data Governance and Information Quality East: Dataversity Conference – Washington, DC – December 4th – 8th

Non-Invasive Data Governance / Non-Invasive Data Governance Strikes Again Books

2014: ISBN 9781935504856 / Technics Publications / Amazon.com

May 2023: ISBN 9781634623599 / Technics Publications / Amazon.com

Non-Invasive Data Governance / Metadata Governance Online Learning Plans

Latest: Business Glossaries, Data Dictionaries and Data Catalogs

Build Your Own Data Governance Framework

Abstract

- In this webinar, I will share ...
 - A Customizable Data Governance Framework
 - How to Determine Appropriate Components
 - How to Determine Appropriate Levels
 - Getting Specific: Filling in the Boxes
 - Leveraging Your New Framework to Govern Data

Build Your Own Data Governance Framework

Definitions

- **Data Governance** – The execution and enforcement of authority over data.
- **Data Stewardship** – Formal accountability for data.
- **Data Steward** – A person held formally accountable for their relationship to the data.
- **Data Governance Framework** – A basic conceptual structure for Data Governance.

NON-INVASIVE DATA GOVERNANCE™ FRAMEWORK

Hit **ESC** to Exit Framework

Tools

Executives use executive-level reporting tools to monitor the overall health of data governance efforts.

Utilize data profiling and analytics tools for strategic data analysis.

Employ data quality tools and metadata management systems for project-specific tasks.

Use data quality, data lineage, and data governance tools for daily operations.

Use ticketing systems and data catalog tools for support tasks.

Build Your Own Data Governance Framework

A Customizable Data Governance Framework

- Core Components and Levels
- Framework Structure
- Color Coordination with Other Templates
- Getting the Terminology Correct

Build Your Own Data Governance Framework

A Customizable Data Governance Framework

- Core Components and Levels
 - Two Dimensional to Start
 - Key Considerations for a Successful Data Governance Program
 - Meant to be Adjusted Per Your Organizational Requirements
 - Who, What, Why, Where, When, and How
 - Who Cares / Who Needs to Care

Build Your Own Data Governance Framework

A Customizable Data Governance Framework

 - Operating Model of Roles and Responsibilities
 - Common Data Matrix
 - RACI (Process) Matrix
 - Communications Plan

Build Your Own Data Governance Framework

A Customizable Data Governance Framework

Data Governance Communication Plan Matrix

This matrix maps communication activities across four levels (Executive, Strategic, Tactical, Support) and six components (Data, Rules, Processes, Communications, Metrics, Tools).

Level	DATA	RULES	PROCESSES	COMMUNICATIONS	METRICS	TOOLS
EXECUTIVE						
STRATEGIC						
TACTICAL						
SUPPORT						

Data Governance Framework Matrix

This matrix maps the framework components across four levels (Executive, Strategic, Tactical, Support) and six components (Data, Rules, Processes, Communications, Metrics, Tools).

Level	DATA	RULES	PROCESSES	COMMUNICATIONS	METRICS	TOOLS
EXECUTIVE						
STRATEGIC						
TACTICAL						
SUPPORT						

KIK CONSULTING & IS - COMMON DATA MATRIX

This matrix maps the framework components across four levels (Executive, Strategic, Tactical, Support) and six components (Data, Rules, Processes, Communications, Metrics, Tools).

Level	DATA	RULES	PROCESSES	COMMUNICATIONS	METRICS	TOOLS
EXECUTIVE						
STRATEGIC						
TACTICAL						
SUPPORT						

Build Your Own Data Governance Framework

A Customizable Data Governance Framework

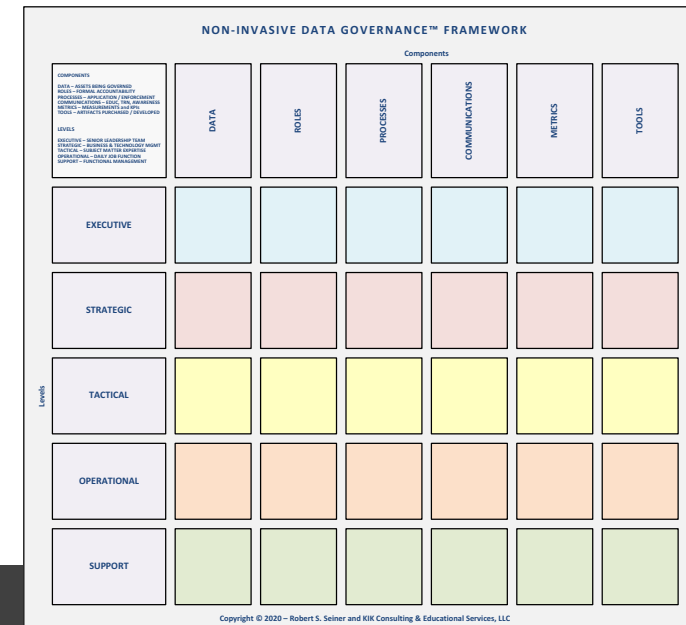

- Getting the Terminology Correct
 - Are the Core Components Complete?
 - Do They Accurately Describe What They Represent?
 - Are the Levels Complete?
 - Do They Accurately Describe Your Organization?
 - Use Language That Makes Sense to Your Organization
 - Don't Be Afraid to Add or Eliminate Components or Levels

Build Your Own Data Governance Framework

How to Determine Appropriate Components

- Data – Assets Being Governed and Quality Improved
- Roles – Formal Accountability Data Governance and Information Quality
- Processes – Application / Enforcement
- Communications – Education, Training and Awareness
- Metrics – Measurements and Key Performance Indicators (KPIs)
- Tools – Artifacts Purchased & Developed
- Business Value – Outcome & Results, Expectations

Build Your Own Data Governance Framework

How to Determine Appropriate Components

- Data – Assets Being Governed and Quality Improved
 - The scope of the resources that are being governed is the first core component of a Data Governance Framework.
 - Organizations with formal programs can learn from, and should differentiate between data, information, records and knowledge.
- Roles – Formal Accountability Data Governance and Information Quality
 - The way people are associated with the roles they play is a significant predictor of the effort required to govern the data.
 - Roles are a back-bone (core component) of many governance and quality tools.

Build Your Own Data Governance Framework

How to Determine Appropriate Components

- Processes – Application / Enforcement
 - The notion of a singular “Data Governance process” misrepresents the fact that processes are a primary component of DG program success.
 - There is not a single process that is governed, rather there are a series of processes to which governance will be **applied**.
- Communications – Education, Training and Awareness
 - Raising the data awareness of the governance and quality perspective of every person that defines, produces, and uses data is critical to achieving program success.
 - Elevating Data Literacy by helping people to tell stories “about data”. Tell stories “with data”.
 - Education must focus on policies, handling rules, best practices, standards, processes, and role-based governance activities.

Build Your Own Data Governance Framework

How to Determine Appropriate Components

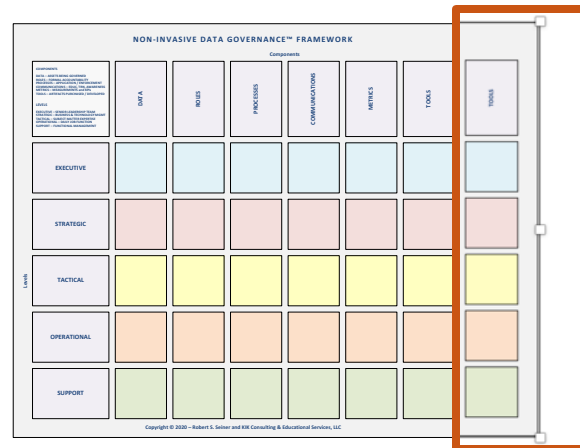

- Metrics – Measurements and Key Performance Indicators (KPIs)
 - The impact and value **may be financially quantifiable**, but this may not **always be the case**.
 - Measuring efficiency and effectiveness improvements require benchmarks of present state and the governed activity of measuring and reporting results.
 - Requires understanding what needs to be measured at each of the Levels.
- Tools – Artifacts Purchased & Developed
 - Tools of DG & DQ enable the program to deliver value to the organization.
 - Organizations use tools they develop internally as well as tools that they've purchased to fill specific needs of their programs.
 - The tools that are developed or purchased are based on practicality, ease-of-use, and the specific goals of the DG & DQ program.

Build Your Own Data Governance Framework

How to Determine Appropriate Components

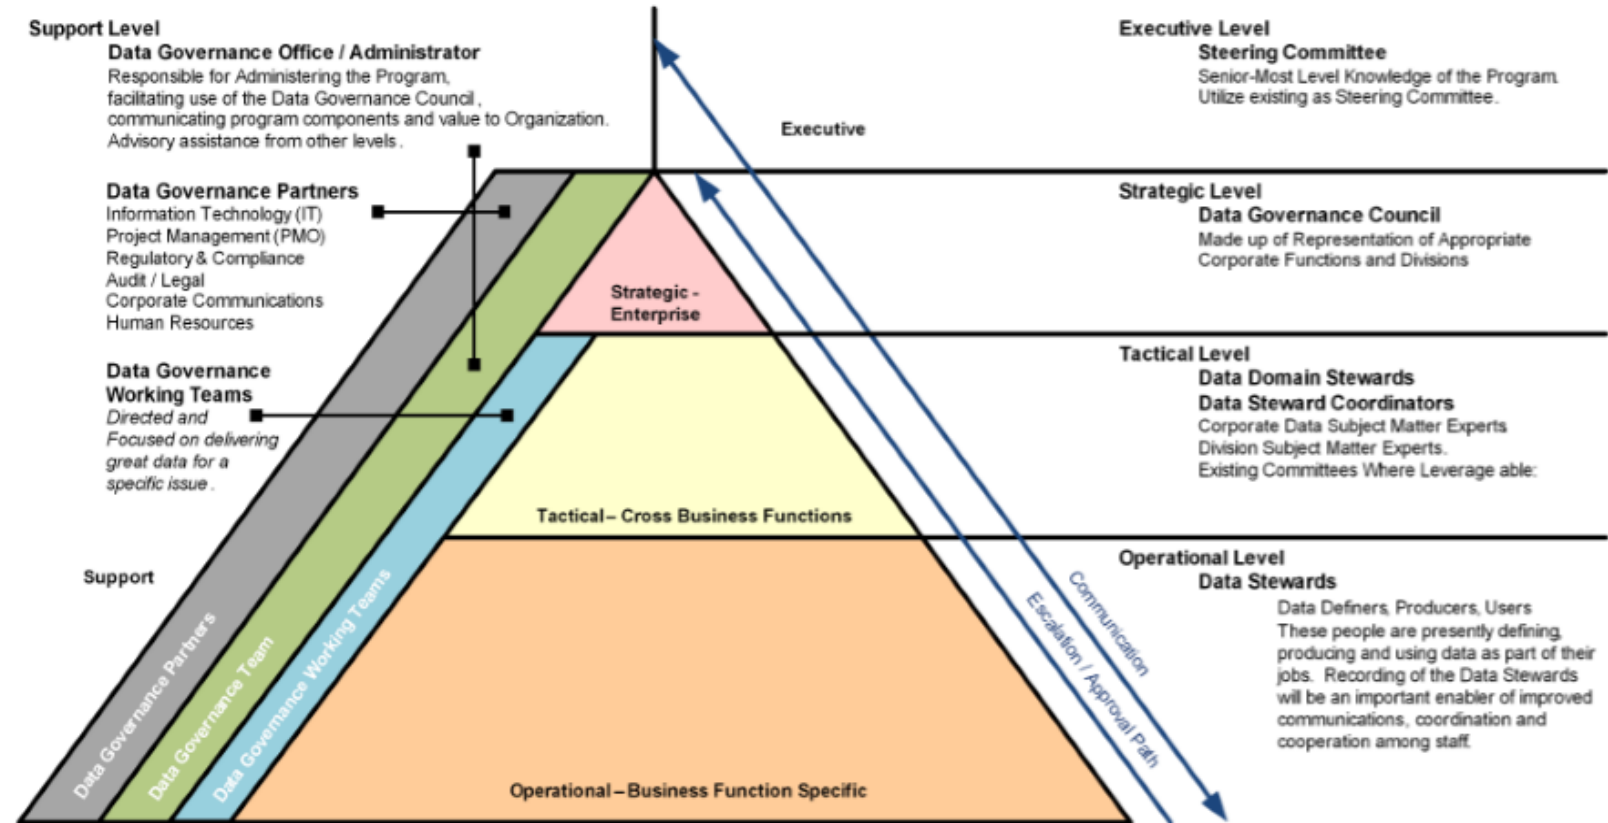

- Business Value – Outcome & Results, Expectations – **New Column?**
 - Executive Level – Aligns with Business Goals
 - Strategic Level – Identifies Valuable Data Assets
 - Tactical Level – Establishes Standardized Processes
 - Operational Level – Empowers Staff
 - Support Level – Ensures Compliance, Mitigates Risks, Protects Reputation

Build Your Own Data Governance Framework

How to Determine Appropriate Levels

- Executive
- Strategic
- Tactical
- Operational
- Support
- Administrative

Build Your Own Data Governance Framework

How to Determine Appropriate Levels

- Executive
 - The Executive level typically consists of people at the highest level.
 - This includes Presidents, Chairs, Senior Vice Presidents, and CXO level positions (meaning CEOs, COOs, CIOs, CDOs, CROs, CMOs, etc.).
 - The Executive Level of an organization often has regular or scheduled meetings as the Steering Committee for the enterprise.
- Strategic
 - The Strategic level typically consists of people that report directly to and are delegated by the Executive level to oversee and direct specific initiatives.
 - This can include Senior Vice Presidents, Vice Presidents, and the people that are recognized as being second-in-command or as representing their part of the organization in the initiative.
 - The Strategic level is accountable to the Executive level for the success of the initiative.

Build Your Own Data Governance Framework

How to Determine Appropriate Levels

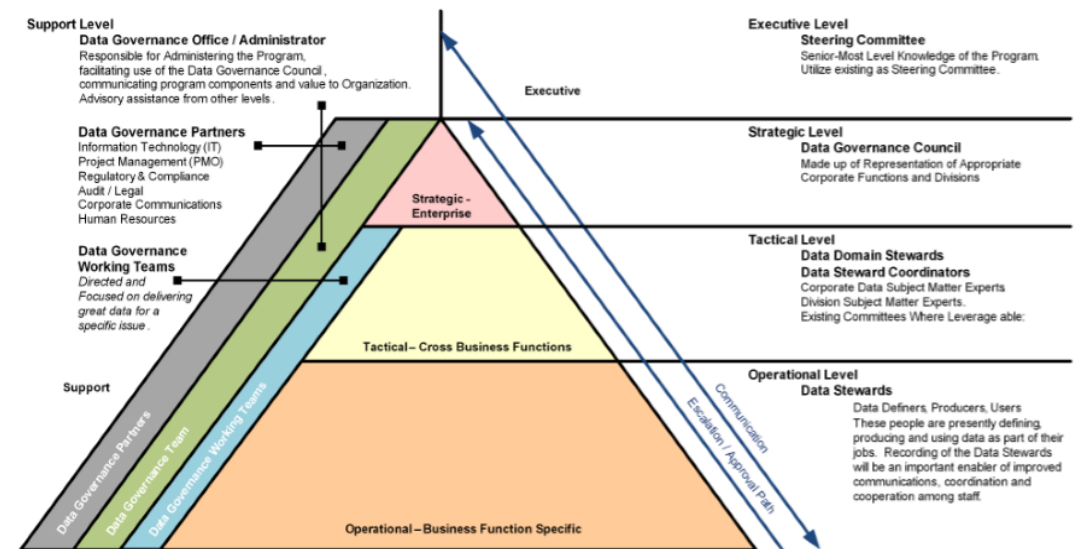

- Tactical
 - The Tactical level typically consists of people that are subject matter experts, facilitators, and potentially decision makers for specific domains of data and information.
 - The Tactical level is delegated or recognized by the Strategic level as people that must be included in and drive decisions that are made regarding data in their domain.
- Operational
 - The Operational level typically consists of every person in the organization that has a relationship to data and that is (or will be) held formally accountable for that relationship.
 - The relationships include the definition, production, and/or use of data and information.
 - If an individual does any or all of these activities as part of their job, it is a requirement that these people follow policy, best practices and standards for that relationship.

Build Your Own Data Governance Framework

How to Determine Appropriate Levels

- Support
 - Data Governance Partners
 - Data Governance Working Team
 - Data Governance Administration
- Administrative
 - Data Governance Administrator
 - Data Governance Manager
 - Data Governance Lead
 - Data Governance Team or Office

Build Your Own Data Governance Framework

Getting Specific: Filling in the Boxes

- Bridges
- Components at Each Level
- At Some Point ... You Will Need to Know This Information.
- Multiple Dimensions
- Artifacts and Templates

Build Your Own Data Governance Framework

Getting Specific: Filling in the Boxes

- Bridges
 - A Framework is a “Basic Conceptual Structure” *Merriam-Webster Dictionary*
 - Application of a Framework Must Address Where the Rubber Hits the Road
 - Planning for Each Component at Each Level (Bridge)
 - Knowledge-Base and Intelligence for Each Bridge
 - Dimensional Views of Each Bridge
 - Artifacts and Templates for the Appropriate Bridges

Build Your Own Data Governance Framework

Getting Specific: Filling in the Boxes

- Components at Each Level
 - Data Component at Each Level – Data Strategy
 - Roles Component at Each Level – Operating Model
 - Process Component at Each Level – Governance Activities
 - Communications Component at Each Level – Communication Model
 - Metrics Component at Each Level – Metrics Model
 - Tools Component at Each Level – Tools Model

Additional Bridge Questions to Consider: Data

What data is critical for decision-making at each level?
How should data be accessed, shared, and used at each level?
What data quality/integrity standards are required at each level?

Additional Bridge Questions to Consider: Roles

What are the data-related responsibilities and accountabilities?
How should data-related communication and collaboration be facilitated?
What skills, knowledge, and training are required for each role?

Additional Bridge Questions to Consider: Tools

What are the data governance tools needed at each organizational level?
How should the data governance tools be integrated and interoperable?
What are the training and support needs for using tools?

Additional Bridge Questions to Consider: Processes

What are the data-related processes and workflows?
How should data-related decision-making and escalation occur?
What are the data governance compliance and audit mechanisms?

Additional Bridge Questions to Consider: Metrics

What are the KPIs and metrics relevant to each level's objectives?
How should the data governance metrics be collected, analyzed, reported?
What are the thresholds and targets for data governance metrics?

Additional Bridge Questions to Consider: Communications

What are the data communication needs and requirements?
How should data-related information be disseminated and shared?
What is the data governance communication plan and strategy?

Build Your Own Data Governance Framework

Getting Specific: Filling in the Boxes

- At Some Point ... You Will Want to Know the Information ...
 - “... Every Component from Every Perspective”
 - John Zachman ... about the Zachman Framework for Enterprise Architecture
 - You Will Want to Know About Every Data Governance Component from Every Level

The Veterans Affairs Zachman Framework w/an explanation of its rows.

	DATA What	FUNCTION How	NETWORK Where	PEOPLE Who	TIME When	MOTIVATION Why
Objective/Scope (contextual) Role: Planner	List of things important in the business	List of Business Processes	List of Business Locations	List of important Organizations	List of Events	List of Business Goal & Strategies
Enterprise Model (conceptual) Role: Owner	Conceptual Data/ Object Model	Business Process Model	Business Logistics System	Work Flow Model	Master Schedule	Business Plan
System Model (logical) Role: Designer	Logical Data Model	System Architecture Model	Distributed Systems Architecture	Human Interface Architecture	Processing Structure	Business Rule Model
Technology Model (physical) Role: Builder	Physical Data/Class Model	Technology Design Model	Technology Architecture	Presentation Architecture	Control Structure	Rule Design
Detailed Representation (out of context) Role: Programmer	Data Definition	Program	Network Architecture	Security Architecture	Timing Definition	Rule Speculation
Functioning Enterprise Role: User	Usable Data	Working Function	Usable Network	Functioning Organization	Implemented Schedule	Working Strategy
