Data & Analytics

Optimize Organizational Processes to Monetize Data

Audit, Assure and Deploy Strategic Applications for Compliance

Drive Modernization programs to help organizations evolve

Take advantage of Data Science to Deliver Strategic Business Outcomes

Simplify the path to new platforms and packaged or open-source solutions

DATA & ANALYTICS

ENTERPRISE GOVERNANCE	DATA PRIVACY GDPR/CCPA	DATA FABRIC	AGILE DATA SCIENCE	MODERNIZATION & MIGRATIONS
Engage the organization and processes to measure, design, deploy and deliver enterprise class Data Governance Programs to Monetize and ensure that data becomes a key strategic asset	Be the TRUSTED advisor in the education, analysis and deployment of Governance Risk and Compliance solutions to enable our customers to deliver the key components of compliance.	Help our clients to understand and take advantage of cutting-edge solutions and technologies that are built upon the foundation of AI using Machine Learning and NLP in open environments	Educate and engage our clients to drive meaningful and actionable results to benefit the business and take advantage of the data supply chain with insights	Enable our customers to take the journey to new systems (platforms, warehouses, environments) through the use of a repeatable 'factory' style approach to deployment and best practices

Operational Intelligence (AI/Machine Learning & Analytics)
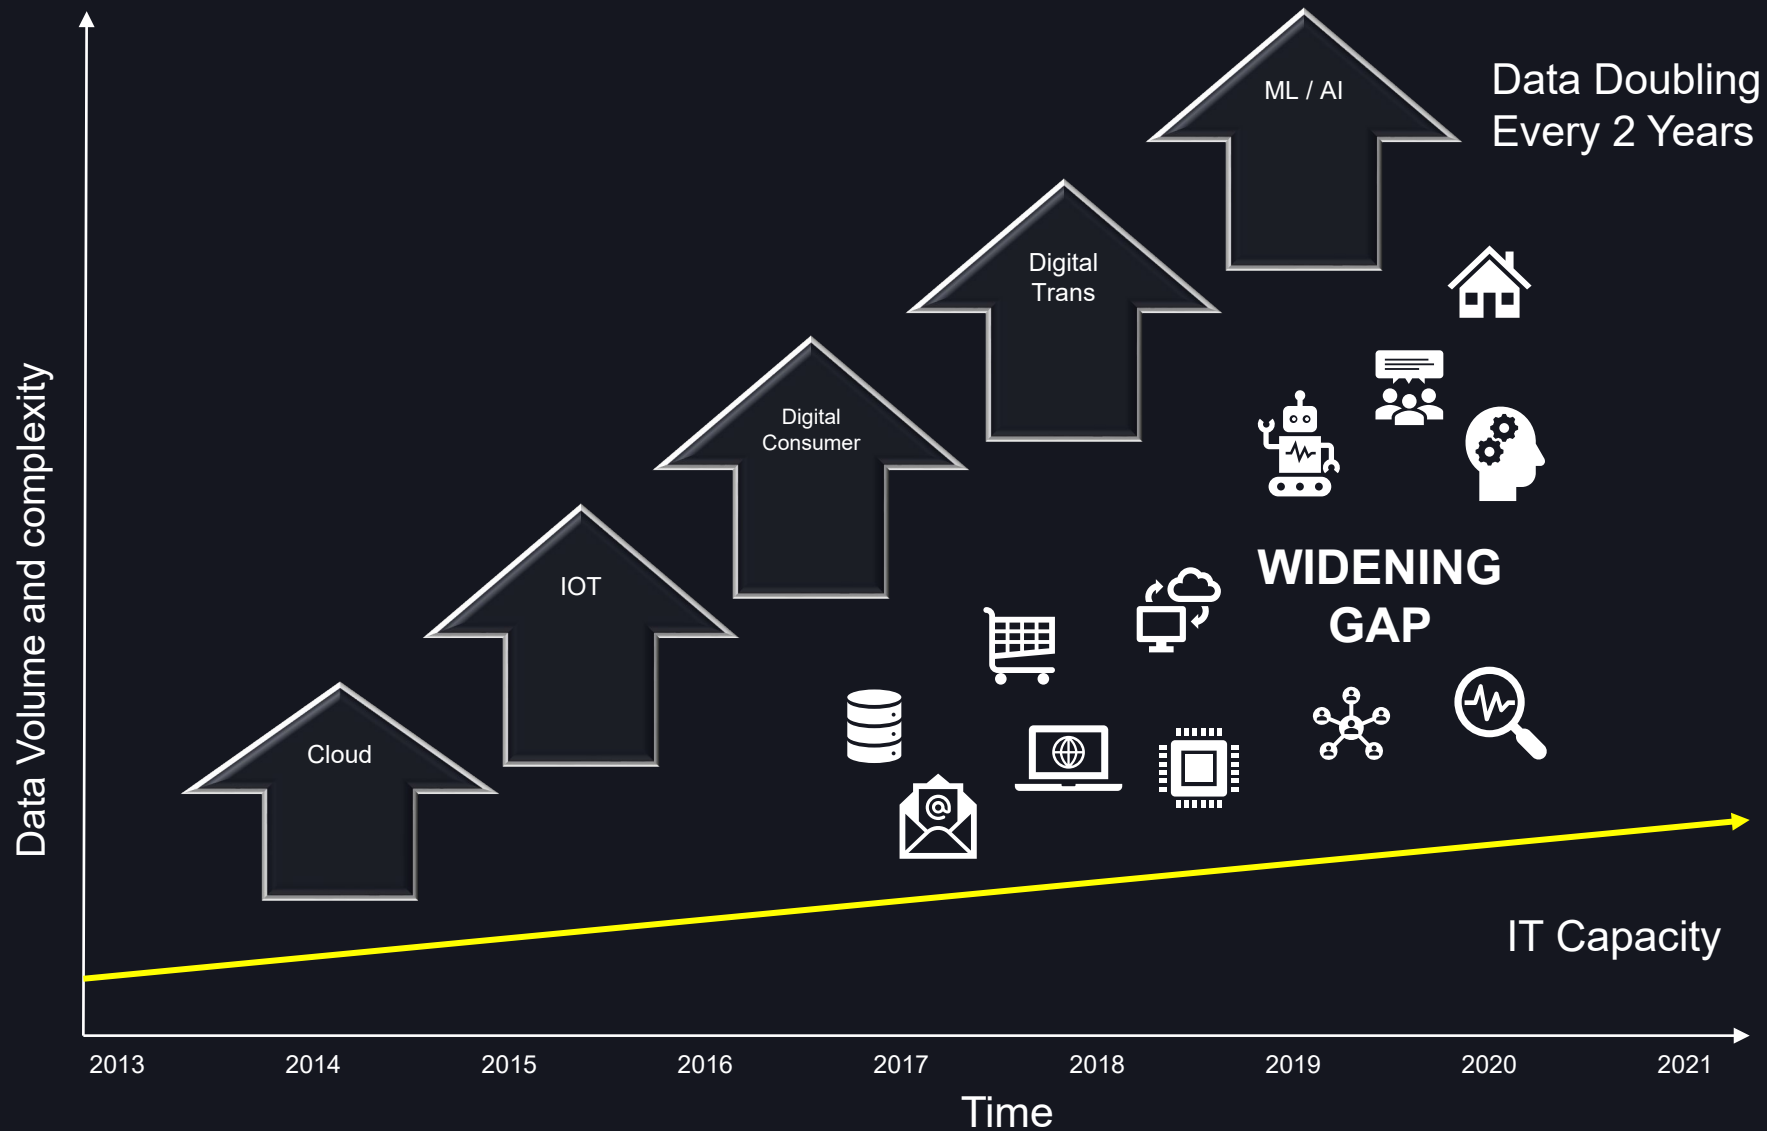

On premise   Hybrid Cloud   Public Cloud   Managed Services

Prolifics.

Lack of Data Control Combined With Data Privacy Demand = Risk

What do we do?
Mitigate Complexity with Simple, Easy to Use Solutions

Deep discovery identifies, tags, inventories, and classifies sensitive data. All sources, all locations, all data types.

Tracks and monitors sensitive data and reports on your financial exposure in near real time.

Provides complete protection with dynamic remediation when policies are breached.

The needed key to data loss prevention

Speed and scale to meet the needs of complex businesses

Exceptionally accurate, captures what you deem to be "sensitive"

Data Sentinel never rests, it's always hunting for breaches in policy

DATA SENTINEL

Use Cases driven to your business demand
6 KEY focus areas – enabled at the solution itself

Compliance

Deliver Deep scanning and itemization of all data associated with compliance & execute DSAR Processing requirements

Sensitive Data Audit

Deliver deep scanning, tagging and identification of high priority and high-risk data assets. Showcase risk areas and key areas for remediation

Accelerated Governance

Deliver deep scanning and tagging to quickly find Critical Data Elements (CDE) for governance programs.

DLP – Data Loss Prevention

Deliver deep scanning, tagging and prioritization of highest risk data to deploy DLP applications for protection or encryption
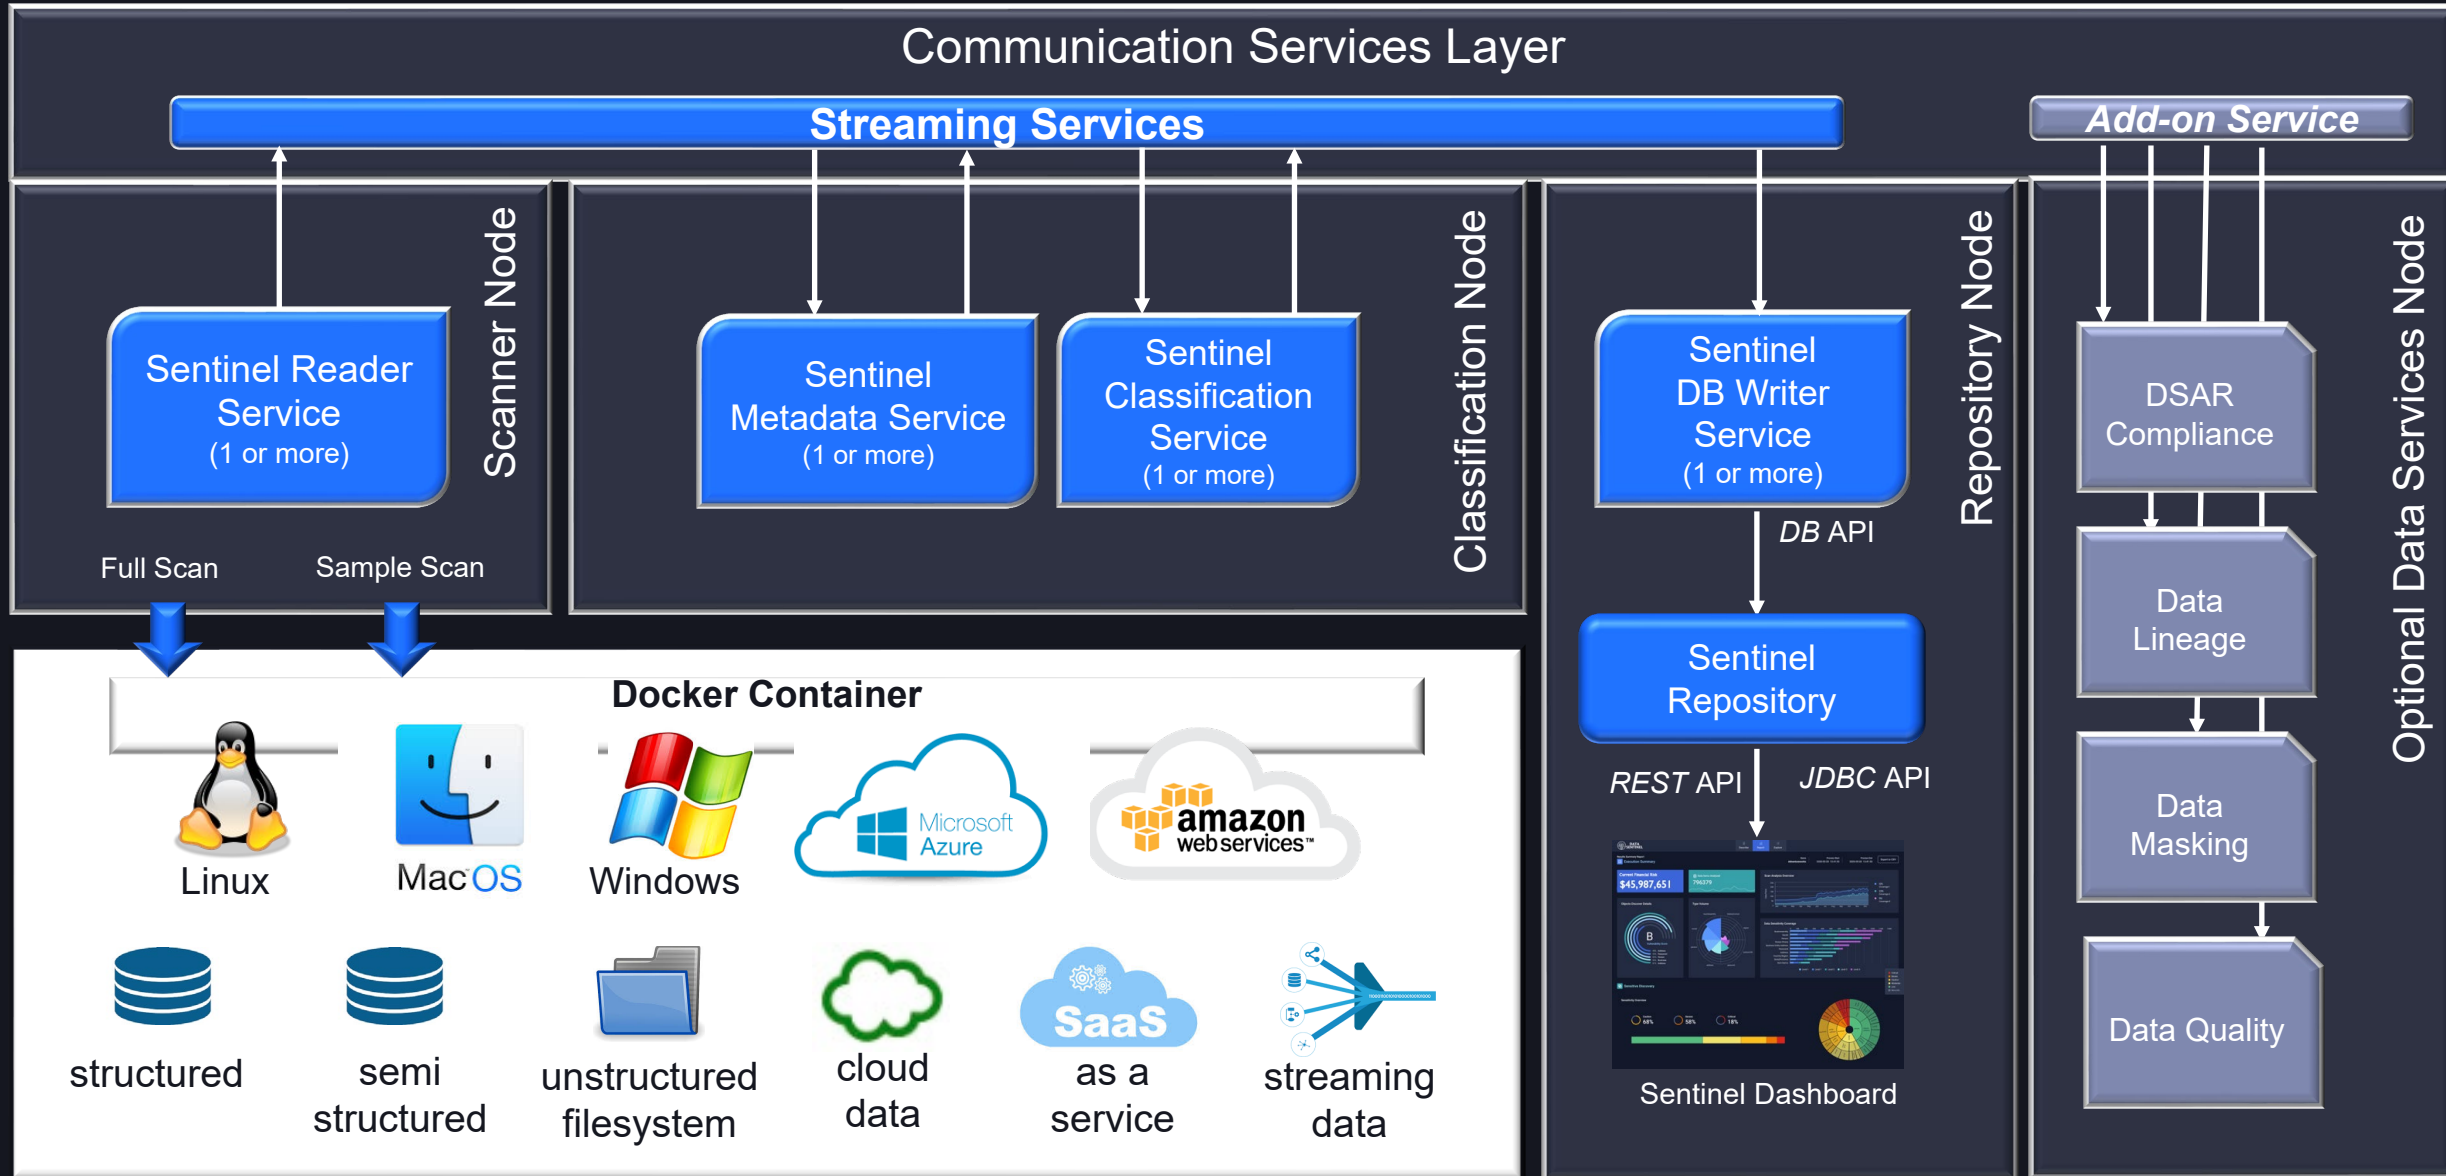

Data Sharing

Deliver a full understanding of data, locations and content to enforce customer and industry policies for data sharing across teams and locations

Cloud Migration

Deliver deep scanning, tagging and policies as well as full metadata analysis to provide a rapid deployment approach to cloud.
